

Mohamed Ramadan

Machine Learning & Data Science Engineer

mohamedramadan01156064645flm@gmail.com • 01036815365 • Cairo.Egypt
[LinkedIn](#) • [GitHub](#) • [Portfolio](#)

Profile

Machine Learning & Data Science Engineer with hands-on experience in Python, Machine Learning, Deep Learning, Data Analysis, and Computer Vision. Skilled in developing supervised and unsupervised learning models, including classification, regression, and clustering, using Scikit-learn, TensorFlow, and Keras. Experienced in data preprocessing, exploratory data analysis (EDA), feature engineering, data visualization, model training, and performance evaluation. Proficient in NumPy, Pandas, Matplotlib, Seaborn, Plotly, Jupyter Notebook, Google Colab, VS Code, Git, and GitHub, with a strong foundation in applying data-driven techniques to solve real-world problems.

Education

Bachelor’s Degree in Computer Science at Modern Academy for Computer Science and Information Technology, Cairo.Egypt **October 2022 - May 2026**

Internships

AI Intern at [IT Gate](#), Cairo,Egypt **June 2025 - September 2025**
Data Analysis Intern at [IT Sharks](#), Cairo,Egypt **July 2023 - September 2023**

Skills

Programming Languages: Python, C++, Java, JavaScript
Machine Learning: Supervised Learning, Unsupervised Learning, Classification, Regression, Clustering, Model Training, Model Evaluation, Feature Engineering, Cross-Validation
Deep Learning & AI: Deep Learning, Neural Networks, Convolutional Neural Networks (CNN), Computer Vision, Image Classification, TensorFlow, Keras
Data Science: Data Analysis, Data Preprocessing, Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Statistical Analysis
Libraries: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, Plotly
Computer Science Fundamentals: Data Structures, Algorithms, Object-Oriented Programming (OOP), Database Fundamentals
Tools: Jupyter Notebook, Google Colab, VS Code, Git, GitHub

Projects

Alzheimer’s MRI Classification
Developed a custom Convolutional Neural Network (CNN) for classifying brain MRI images into four Alzheimer’s disease categories. Applied image preprocessing and data preparation techniques to prepare MRI images for deep learning. Trained and evaluated the model using TensorFlow and Keras, applying machine learning model evaluation techniques. Analyzed model performance using classification metrics and data visualization.

3awatly — AI-Powered Career Platform • [3watly](#)
Next.js 15, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Gemini AI

Developed an AI career platform for the Egyptian job market featuring ATS CV scoring, skill-gap analysis, job discovery, and AI-powered career guidance. Built a Career Copilot with Gemini AI capable of analyzing users’ CVs and providing personalized career recommendations. Implemented authentication, CV/job data management, and responsive UI using Supabase, PostgreSQL, Next.js, TypeScript, and Tailwind CSS.
